Frontend Test- FullThrottle Labs

Go through the sample JSON file given here -
https://drive.google.com/open?id=1xZa3UoXZ3uj2j0Q7653iBp1NrT0gKj0Y

This JSON file describes a list of users & their corresponding periods of activity across multiple months. You'll need to extrapolate this json sample to get a JSON sample for powering your mock API and your UI.

Now, design and implement a user interface that allows a user to view a list of hardcoded users from a mock API server. On clicking on any user, a modal should open which displays all the time ranges during which they were active on that day, with an option to view all the periods of activity for different days using a calendar.

Instructions:
- Please complete this assignment using React. Feel free to use any other UI libraries/frameworks as you see fit.
- The code should be production ready and hosted somewhere in a publicly accessible location like on AWS, Heroku, etc.
- Please include a README file.

Submission:
Please submit the source code of your solution as a public GitHub repo. No zips allowed.

Assessment Criteria:
- Code correctness.
- Overall code quality.
- UI/UX
- Documentation
